PROFESSIONAL SUMMARY

QA Engineer with 1+ year of hands-on testing of web platforms and Flutter mobile applications (Android and iOS) at Findo Group, following two years as a data entry and SEO specialist at the same company. Experienced in functional, UI, regression, smoke, sanity, exploratory and localization testing; designing test scenarios; writing reproducible bug reports with severity and priority; and retesting fixes with development teams in Jira. Authored 7 structured QA reports covering 5 products and 69 documented issues. Builds test automation with Playwright (JavaScript/TypeScript) and created QA Pro, a desktop tool that runs 20 automated test suites on any website. Native Arabic speaker with strong Arabic localization and RTL testing skills.

CORE QA SKILLS

Testing Types: manual testing, functional testing, UI/UX testing, regression testing, smoke and sanity testing, exploratory testing, mobile app testing, web application testing, localization and RTL testing, AI feature testing, cross-browser testing

QA Process: test planning, test case and test scenario design, bug reporting and tracking, severity and priority assessment, retesting, SDLC, STLC, release readiness reviews, App Store and Google Play review guidelines

Automation & Code: Playwright (JavaScript, TypeScript), Page Object Model, GitHub Actions CI, Electron, Python (basics), HTML, CSS, JavaScript, Flutter/Dart (basics), Git and GitHub

Tools & Platforms: Jira, Android Emulator, iOS Simulator (Xcode), real Android and iOS devices, Chrome DevTools, Microsoft Excel, Word, PowerPoint, SQL, Claude, Claude Code, ChatGPT, Gemini

PROFESSIONAL EXPERIENCE

QA Engineer (Web & Mobile) | Findo Group **Oct 2025 – Present**
Remote, Full-time

- Perform manual testing of web platforms and Flutter mobile applications on Android and iOS before every release, across user and admin workflows.
- Design and execute functional, UI, validation, smoke, exploratory and regression test scenarios for registration, authentication, booking, subscriptions, payments, wallet transactions, listings and dashboards.
- Prepared 7 structured QA reports (Jul – Sep 2026) covering 5 web and mobile products and 69 documented issues, each with steps to reproduce, expected vs. actual results, severity, priority and screenshots.
- Log and track issues in Jira, coordinate with developers, retest fixes and run regression checks on every new build until each issue is closed.
- Validate Arabic and English localization, RTL/LTR layouts, date and currency formats, forms, filters, notifications, error messages and AI-generated responses.
- Review iOS and Android builds against App Store and Google Play guidelines and help investigate store review rejections.
- Contribute to Flutter feature fixes and API integration alongside testing; use AI tools to draft test cases faster.

Data Entry & SEO Specialist | Findo Group **Oct 2023 – Oct 2025**
Remote, Full-time

- Entered, validated and maintained company and client records in Arabic and English; detected and corrected errors and duplicates.
- Managed product data and SEO content for a women's footwear e-commerce store on WordPress/WooCommerce for about a year.

PRODUCTS TESTED

Findo AI | On Time – Beauty Salon | B5 Hunt | Laundry Mobile Application | RNTUP | URCLINIC | Taqdar | Auto AI Magics | Visa Queen | Safari — covering authentication and verification, booking flows, payment validation, subscriptions, forms, dashboards, localization, RTL layouts, AI responses and cross-platform UI behavior.

QA PROJECTS & AUTOMATION

QA Pro — Automated Website Testing Tool **2026**
Personal project | Electron, Playwright

- Desktop application that opens any website, runs 20 automated test suites (links, forms, layout, performance and more) and generates a report of the issues found.

qa-automation-playwright — Public GitHub Repository **2026**
Playwright, TypeScript, GitHub Actions

- 15 end-to-end test cases (login, sorting, cart, checkout totals, validation) run on desktop Chrome and a Pixel 7 viewport, built with the Page Object Model and CI on every push.
- Matching manual test plan, test cases and bug reports, traceable to the automated tests by test ID.

QA Bug Tracker **2026**
Personal project

- HTML bug-tracking tool with an Excel template for logging issues, severity, status and retest results.

EDUCATION

Bachelor of Arts in Geography — Surveying & GIS Division **2022 – 2026**
Faculty of Arts, Damanhour University, Egypt | Grade: Very Good | Ranked 3rd in the faculty

CERTIFICATIONS

- Claude 101 — Anthropic, Jul 2026
- CSS: From the Basics to Pro (course and project) — Skillshare, Oct 2026

LANGUAGES & AVAILABILITY

Arabic: Native | English: Intermediate (working proficiency) | Available for full-time remote work; flexible with shifts.
