PROFESSIONAL SUMMARY

QA tester with one year of remote QA experience at Findo Group, after two years there as a data entry specialist. I test Flutter mobile apps (iOS and Android) and web platforms before release, write clear test cases and bug reports, run regression testing and track issues in Jira. I built my own Playwright tool that runs 20 automated test suites on any website. Strong in Arabic localization, right-to-left and AI feature testing, with a data background in Excel, SQL and Python.

EXPERIENCE

QA Tester, Findo Group **Oct 2025 – Present**

Remote, full-time

- Test Flutter mobile apps on iOS and Android (Xcode Simulator, Android emulator and real devices) and web platforms before every release.
- Wrote 7 structured QA reports (July–September 2026) covering 5 web and mobile products and 69 issues, each with steps to reproduce, expected and actual results, severity and screenshots.
- Log, prioritize and track issues in Jira, re-test fixes, and run regression checks on every new build until each issue is closed.
- Check Arabic localization, right-to-left layouts and AI feature responses; for example, found an AI assistant answering in English when Arabic was selected.
- Review builds against App Store and Google Play guidelines before submission, and use AI tools to draft test cases and speed up reporting.

Data Entry Specialist, Findo Group **2023 – 2025**

- Entered and maintained company records in Arabic and English, checked data against sources and fixed errors.
- Prepared reports in Excel, Word and PowerPoint and used SQL to look up and update records.

PROJECTS

QA Pro, Automated Website Testing Tool **2026**

Personal project

- Built a desktop app (Electron + Playwright) that opens any website, runs 20 automated test suites and produces a report of the problems found.

QA Reports Portfolio **2026**

Published on my portfolio website

- Selected QA reports for web and mobile products, showing my test approach, bug report format and severity ratings.

SKILLS

Testing: manual, functional, regression, smoke, exploratory and UI testing; test case design; bug reporting and tracking; severity and priority; localization and RTL testing; AI feature testing

Automation: Playwright (JavaScript), Python (data types, lists and dictionaries, loops, functions, scripts)

Platforms: iOS and Android (Xcode Simulator, Android emulator, real devices), web browsers, App Store and Google Play review guidelines

Tools: Jira, Excel, SQL, Power BI, Git basics, Claude and Claude Code, ChatGPT, Gemini

EDUCATION

B.A. in Geography, Surveying and GIS Division **2022 – 2026**

Faculty of Arts, Damanhur University | Grade: Very Good | Ranked 3rd in the faculty | Graduation project awarded a certificate of appreciation for excellence

CERTIFICATES

- Claude 101, Anthropic (Jul 2026)
- AutoCAD certificate, officially stamped
- Surveying software (Sokkia Link, Surfer, AutoCAD, Civil 3D), Misr Public Library, Damanhour (2024 – 2025), Very Good

Languages: Arabic (native), English (intermediate, working proficiency) | **Availability:** immediately, remote, full-time or part-time
